# Site Selection Guidelines

---

Development contractor will prepare a site selection report according to the given standard of PEDO. In this case, the development contractor starts also the social mobilization and community communication with community that submitted the site pre-application.

The site selection shall cover the following in detail:

**Site Location:** Coordinates of Site location, Stream name, Demography, and details of nearby projects to be provided

**Site:** Detailed description and Site conditions

**Estimated Hydro Power Potential:** Potential capacity

**Beneficiaries:** Number of households (men headed/women headed) and local enterprises supplied

**Contribution:** Liaison and educate/mobilize the locals

**Tariff:** Acceptance of PEDO's tariff structure/formula by community

**Asset Transfer:** Willingness for lease agreement of PEDO assets

**Land availability:** Willingness for voluntary land lease

**Resettlement:** Avoidance of potential resettlement/rehabilitation issues

**Safeguard:** Potential environmental and social constraints

PEDO Criteria for Site Selection:

Step 1:

Acceptance / Rejection scheme with above defined criteria checklist

Step 2:

If site is in the rank of 1000 projects, project will be approved.

If site is not approved, the site will then be set on a wait list for potential next phase.
